Subject Index

Acoustic reflex threshold 53
Activity level, prestimulus 44, 164
AER, late components of the 466
–, middle components of the 456
Afferent and efferent nerve endings 383
– – – neurons 383
Ambient noise 232
Application of psychoacoustical techniques 269, 274, 300, 312, 336, 354, 368
Audiocups 232
Audiometric tests 93
Audiometry, electric response (ERA) 130, 456, 466
– in children, speech 21
–, speech 34, 185
–, threshold 144, 232
Auditory evoked response (AER) 466
Auditory fatigue 238
– frequency analysis 443
– – selectivity 419
– localization and hearing loss 368
– masking 34, 269, 274, 336
– nerve 130
– – fibers 443
– overload 274
– tasks, binaural 354
Auraldome 144
Automated testing 185
Average component of the summating potential 408
Averaged electroencephalic response (AER) 456

Backward and forward masking 336
Basilar membrane displacement 408
Behavioural-electrophysiological correlation 130
Behavioural responses 44, 164
Binaural auditory tasks 354
– hearing 300
– neurons 72
Brain stem 93, 130
Broad band noise 152

Central masking 34, 336, 354
Children, deaf 466
–, handicapped 466
–, ototoxic lesions in 173
–, speech audiometry in 21
Circumaural earphones 144
Click spectrum, third-octave 135
– threshold, repetition rate and 135
– waveform, third-octave 135
Clinical use of intensity difference thresholds 312
CM tuning curves 408
Cochlea, innervation components of the 383
Cochlear filter, second 419
– filtering, pathology of 419
– frequency selectivity 419
– function 381, 383, 408, 419, 443
– microphonic (CM) 408
– neurophysiology 443
– potentials 72, 408
Columellar interposition 84
Comfortable intelligibility of speech 27
Comfortable loudness of speech 27
Consonants, voiceless 1
Cortical response, evoked 456

Deaf children 466
Deafness 419
Detection of gaps in noise 336
Dichotic competition speech tests 300
Difference limen for intensity (DLI) 63, 354
– limens, intensity 312
Differential component of the summating potential 408
Diffraction, head 244
Directional hearing 368

– – as diagnostic tool 368
Distortion 274
DLI, stapedial reflex 63

Ear canal resonance 244
Earmolds 259
Earphones, circumaural 144
EEG, testing strategy 466
Electric response audiometry (ERA) 130, 456, 466
Electrocochleography 130
Evoked cortical response 456
Eye colour 238

Fatigue, auditory 238
Forward masking, backward and 336
Frequency analysis, auditory 443
– discrimination for noise bands 1
– – – pure tones 1
– resolution 274
– response 259
– selectivity, auditory 419
– –, cochlear 419
– transposition 1

Ganglion cells, spiral 383
Guinea pig 408

Hair cells 443
Handicapped children 466
Head diffraction 244
Hearing aids 244, 259, 368
– conservation 232
– disorders 93
– loss, auditory localization and 368
– –, sensorineural 336
– screening, neonatal 152

Identification and discrimination of speech sounds 21
Impedance of the ear 118
Implant, tympano-ossicular 84
Infant auditory testing 164
Inferior colliculus-evoked response 72
Inner and outer sensory cells 383, 443
Innervation components of the cochlea 383
Intelligibility of speech, comfortable 27
Intensity, difference limen for (DLI) 63, 354
– difference limens 312
– – thresholds, clinical use of 312
Interposition, columellar 84
Iris pigmentation 238

Language dominance 300
Late components of the AER 466
Localization and hearing loss, auditory 368
– of sound 354
Loudness 259, 269
– of speech, comfortable 27
– recruitment 269, 383, 419

Machine scoring 466
Masking, auditory 34, 269, 274, 336
–, backward and forward 336
–, central 34, 336, 354
– influence 232
– level difference (MLD) 354
Meaningful and nonsense words 21
Middle components of the AER 456
Middle ear muscle reflexes 63
Monaural sensitized speech tests 300
Most comfortable listening 27
Multiple sclerosis 63

Narrow band noise 152
Neonatal hearing screening 152
Neonates 152
Nerve, auditory 130
– endings, afferent and efferent 383
– fibers, auditory 443
Neurons, afferent and efferent 383
–, binaural 72
Neurophysiology, cochlear 443
Newborn testing 44
Noise 144
–, ambient 232
– bands, frequency discrimination for 1
–, broad band 152
–, detection of gaps in 336
Noise-induced permanent threshold shift (NIPTS) 72
– temporary threshold shifts (NITTS) 130
Noise, narrow band 152

–, speech discrimination 336
Nonsense words, meaningful and 21

Observation period, prestimulus 44, 164
Ossiculoplasty 84
Otosclerosis 118
Ototoxicity 173
Outer sensory cells, inner and 383, 443
Overload, auditory 274
Overtones 274

Pathology of cochlear filtering 419
Permanent threshold shift (PTS) 72
– – –, noise-induced (NIPTS) 72
Phonemic discrimination 185
Presbyacusis 185
Prestimulus activity level 44, 164
– observation period 44, 164
Pretest sensitizing agent 152
Psychoacoustical techniques, application of 269, 274, 300, 312, 336, 354, 368
Psychophysics 269, 274

Recruitment, loudness 269, 383, 419
Redundance 300
Reflex amplitude, stapedial 63
– decay, stapedial 63
–, stapedial DLI 63
–, stapedial muscle 53
– threshold, acoustic 53
– –, stapedial 63
Reflexes, middle ear muscle 63
Repetition rate and click threshold 135

Second cochlear filter 419
Sensitizing agent, pretest 152
Sensorineural hearing loss 336
Sensory cells, inner and outer 383, 443
Signal-to-noise ratio 466
Speech audiometry 34, 185
– – in children 21
–, comfortable intelligibility of 27
–, comfortable loudness of 27
– detection 34
– discrimination in noise 336
– reception 34
– sounds, identification and discrimination of 21
– tests, dichotic competition 300
– –, monaural sensitized 300
Spiral ganglion cells 383
Stapedial muscle reflex 53
Stapedial reflex amplitude 63
– – decay 63
– – DLI 63
– – threshold 63
Streptomycin sulphate 173
Summating potential, average component of the 408
– –, differential component of the 408

Temporal integration 53, 336, 354
Temporary threshold shifts (TTS) 72, 130, 238
Testing, automated 185
–, infant auditory 164
–, newborn 44
– strategy, EEG 466
Tests, audiometric 93
Third-octave click spectrum 135
– – – waveform 135
Threshold audiometry 144
– duration function 53
– relations, tone-click 135
–, repetition rate and click 135
– shift, noise-induced permanent (NIPTS) 72
– –, permanent (PTS) 72
– –, temporary (TTS) 72, 130, 238
Tone-click threshold relations 135
Tuning curves, CM 408
Tympanometry 118
Tympano-ossicular implant 84

Variable venting valve 259
Venting 259
– valve, variable 259
Viscoelasticity 84
Voiceless consonants 1

Warble tone 152
Words, meaningful and nonsense 21
